

Dear Prof. Dr. Heiner Igel,

I would like to submit to your kind attention my application for Postdoctoral position at the Ludwig-Maximilians-University of Munich, Germany (Department of Earth and Environmental Sciences - Geophysics Section, Seismology Group).

I am a Geophysicist working in the field of earthquake engineering and seismology since five years. I achieved my Ph.D. in geophysics at the Earth Science Section of the Dept. of Biology, Geology and Environmental Sciences of University of Catania (Italy). After this previous experience I performed a fellowship for two months at University of Malta and later for four months at National Institute of Geophysics and Volcanology (INGV) Catania. At present I have a postdoctoral fellowship at the Icelandic Meteorological Office (IMO) Reykjavik on issues seismic risks and statistical seismology.

The experience gained in this research field leads me to want to grow and expand my knowledge.

My Curriculum Vitae, which I enclose, will certainly offer you a more complete image of my personal and professional profile. As you'll see in the attached CV, I have matured experience in the field of earthquake engineering and seismology, collaborating with several Italian Universities, the University of Malta, the INGV, the IMO and the ETH Zurich. Moreover, I have developed experience in seismic site response with particular topics in seismic wave-field polarization in presence of morphological and tectonic structures.

In my training, I attended specialization courses at qualified institutions. I consider myself a motivated, resourceful, flexible, dynamic person. I'm used to interact with others and I think to have an aptitude for working in a team. Accuracy, reliability, enthusiasm, professionalism, are my main qualities. I hope that my education and my work experience may be of interest for you and I remain at your disposal for any further enlightenments regarding my application.

I thank you for your kind attention and I offer you my most cordial greetings.

Sincerely,

Francesco Panzera

Catania, 26th January 2014
